

RESOLUTION # 1002 - ~~10~~ 13

THE NEED TO SPLIT AREA 58 FOR DEER HUNTING:

Whereas the deer numbers on the public lands continues to be down considerably and is of great concern of local hunters, those who travel within the state and of those who travel home to the area for the deer hunt from outside the state.

Therefore it is recommended that Area 58 be split into two parts A&B with public land being buck only and known as 58A and private land be buck and a limited number of antlerless deer as may be deemed necessary. This area should be known as 58B.

This procedure should stand until the deer herd on these lands has recovered. The reason for and the need for this is that there has been an overkill on the larger does and smaller does in most cases produce a single fawn. The fawn mortality is very high.

This is needed to preserve and improve deer hunting in Area 58
